Driving a real off-road vehicle on extremely challenging desert terrain requires several off-road technologies of real life. Apply physical damage to the vehicle. So, driving off the road as real life to avoid complete damage and levels. PLAYER will enjoy an experience of off-road vehicles at 4-4, a real suspension of the vehicle and a real graphic like PC games. You can use the tracking camera to check if each tire is in the correct position and keep the traction on steep slopes to avoid overthrowing. How to play the DRIVE OFFROAD desert? First of all, we want to present you the game interface. From left to right, we have the speed and speed counters, the choice of two driving wheels and four-wheel drive. As for the gear car, we feel a traction to four-wheel drive at low speed and four-wheel drive switching at high speed. On the right side, there are horizontal angles, accelerator, brake pedal and hand brake. It is the operational interface. For people who drove a car, you will know how to start this off-road vehicle. So let's explain some strategies of difficult levels for you. This game mainly concerns levels. The editor below shares a didactic video and the three difficulty levels of this game, ie 6, 12 and 14 levels. First of all, it is the first level tutorial. This level is mainly to help you familiarize yourself with basic driving operations. You can watch and learn quickly. The difficulty will become higher and higher. In level 6 level 6, many people say this slope is To be climbed. Players who guided cars know that we have to hang the march in the first march during climbing. This game is also the same. First, put the gear in a block, and then weld all the wheels firmly. Close to the slope and you can go up. If you suspend the tire, you will not go on .Level 12 is challenging. At this level, we will directly hit the front and block. At the beginning, don't go straight. We turn right. There is a road on the To climb. Change gears, 4WD and First Gear. Level 14 is dangerous. The main difficulty is in crossing the bridge we have to change the view angle. Use the first view angle, pull the view angle at the top of the head, and you can see the front wheels. So, we need to look at the left front wheel and press the external of the left bridge. Remember that we need to reduce vehicle wear. Players can move left and right to change the vehicles in the lobby interface. Or they can buy vehicles and change them in the mall. The basic operations must be performed in the lobby. Overtal Assesment Sofroad Drive Desert is a fun and adventurous off-road simulation cellular game with realistic and ultra-clear graphics. Simulate real and realistic environments. There are many types of off-road vehicles to choose from and guide the challenges in a variety of difficult environments. The game has a variety of different themes, free driving of various vehicles, free modification and do it yourself. Players will improve the performance of the vehicle, carry the control stop and defeat the opponent easily. Started easily and quickly, challenge all the types of difficult environments and feel the â €
